

cast  
**CAST P**  
pendant lamp

filumen®

#### Description

Compact LED light made out of a solid glass body with a black aluminum top. Suspended via a black wire height-adjustable cable, equipped with an LED module in AC technology, dimmable. Internal frosted lens enables glare-free light. Light characteristics: direct light downwards, particularly suitable for illuminating tables and counters. Unevenness, such as hammer blows, waves and small air inclusions are typical of cast glass technology. These emphasize the technical characteristics of the glass and contrast with the black anodized aluminum top.

#### Dimensions (dxh)

Ø 10 x 13 mm

#### Material

Cast glass, aluminum black anodized

#### Supply cable

PVC-cable black

#### Suspension

Steel wire, black, 260 cm

#### Canopy

Plastic black

#### Light source

LED-module 8W 650lm

#### Light colour / CRI

2700° Kelvin / >80RA

#### Dimmer

Triac

#### Lifetime

min. 50.000h

#### Energy

85%

#### Energy class

A+

#### Type of protection

IP20

#### Protection class

I

#### Mains voltage

220-240V 50/60Hz

#### Net weight

1,66 kg

#### Packing volume

0,0026 m³

#### Certificates

#### Design

**CAST W**  
wall lamp

filumen®

#### Description

CAST W is a compact LED wall lamp consisting of a solid cast glass body and a black anodized aluminum housing. The frosted lens in the glass concentrates and scatters the light without dazzling. The textured glass surface creates mild reflections. Most of the light is directed downwards with a beam angle of around 100°. A curved aluminum arm holds the glass body at a short distance from the wall. This wall lamp fits in various contexts from the entrance area to the stairwell to the living area. A coherent lighting concept can be optimally implemented in a set with pendant and ceiling versions.

#### Dimensions

Ø 10 x d 15 x H 20 cm

#### Material

Cast glass, aluminum black anodized

#### Supply cable

PVC-cable black 3 x 0.5 mm²

#### Mounting

Two-point fixture

#### Light source

LED-module 8W 650lm

#### Light colour / CRI

2700° Kelvin / >80RA

**CAST M**  
ceiling lamp

filumen®

**Description**

CAST M is a compact ceiling lamp analogous to the pendant lamp made out of a solid cast glass and a black anodized aluminum housing. The frosted lens in the glass concentrates and scatters the light without dazzling. The textured glass surface creates interesting reflections. The lamp is mounted on the ceiling using two holes in the aluminum attachment, while the glass body is inserted and fixed at the side. Seals between the glass and aluminum body and between the ceiling and the light make the light splash-proof, which makes the lamp suitable for wet areas. The CAST M assembly light completes the CAST series of pendant and wall lights.
